

BKK Motorbike Rental

1. Project Objective

Create customer value

By using digital technology to solve the tradition problem of renting a motorbike, customers have to go to rental shops physically.

Generate sustainable profit

Show how the business attracts customers, promotions and referrals, marketing, and promoting through social media.

Remain feasible

Demonstrate that the market, technology, operations, finances, and legal/ethical requirements are feasible.

2. Business Concept: BKK Motorbike Rental

The problem

- Traditional motorbike rentals are often **time-consuming and manual**.
- Customers may have difficulty finding **available and suitable motorbikes**.
- Pricing, vehicle condition, and rental information may not always be transparent.
- Manual booking and paperwork can cause delays and errors.

The solution

- **BKK Motorbike Rental** provides a digital platform for customers to **search, book, pay for, and manage motorbike rentals**.
- Customers can check vehicle availability, rental prices, and vehicle information before booking.
- GPS tracking and digital rental management help improve **security and operational efficiency**.

3. Value Proposition & Differentiation

Affordable - Competitive daily, weekly, and monthly rental prices. Discounts for long-term rentals and selected customer groups.

Personalized - Customers can choose different motorbike types and rental durations based on their needs.

Convenient - Online booking and digital payment. Easy vehicle pickup, return, and digital rental management.

Transparent - Clear rental prices and terms. Customers can see vehicle information, availability, and rental charges before confirming.

Competitive advantage

- **Smart digital rental system** combining online booking, GPS tracking, digital payment, and smart vehicle access.
- Better convenience and transparency than a traditional manual rental process.
- Data-driven fleet and maintenance management.

4. Target Market (Age 18-40)

- University students
- Young professionals
- Tourists and short-term visitors
- Local commuters
- Long-term visitors in Bangkok

Target Area

Bangkok, particularly areas with high demand around universities, BTS/MRT stations, tourist areas, and residential communities.

Customer Need

- Affordable transportation
- Flexible rental periods

- Quick and convenient booking
- Reliable and transparent rental services

5. E-Business Model (Digital Infrastructure)

Customer Mobile/Web Platform

- Customer registration and verification
- Motorbike search and availability
- Online booking
- Digital rental agreement
- Online payment
- Rental history

Smart Motorbike Technology

- GPS tracking
- Smart lock/unlock
- Vehicle location monitoring
- Mileage and usage tracking

Business Management System

- Fleet management
- Maintenance scheduling
- Customer management
- Payment and rental records
- Revenue and performance reports

Digital Payment

- Mobile banking
- QR payment
- Credit/debit cards
- Online payment gateway

Simple E-Business Flow

Customer → Mobile/Web App → Look for Available Motorbikes → Booking & Payment → GPS/Smart Lock → Rental Management System

6. Products & Pricing

Pricing is designed to balance affordability, vehicle utilization, customer value, and contribution margin.

Product / Plan	Customer Price	Variable Cost	Contribution
Standard – 1 Day	฿300	฿100	฿200
Premium – 1 Day	฿450	฿150	฿300
Standard – 7 Days	฿1,900	฿600	฿1,300
Premium – 7 Days	฿2,800	฿900	฿1,900
Standard – 30 Days	฿5,500	฿2,000	฿3,500
Premium – 30 Days	฿9,500	฿3,500	฿6,000

Pricing Strategy

Tiered and duration-based pricing, with discounts for longer rentals and demand-based pricing during peak periods.

Promotions

First-rental discount, student offers, referral credits, weekly/monthly packages, and early-booking discounts.

Expected Profit

At ₦300- ₦450 average price per motorbike and ₦100- ₦150 variable cost, contribution is approximately ₦1200- ₦300 before fixed costs.
